

-  Potentially least visible land
-  Potentially most visible land
-  Area from which the site is not visible

Note:
This plan illustrates the extent to which the Site is potentially visible from the local area. This plan has been prepared using computer software (MapInfo). Field verification is required to ensure accuracy of this data.

This first sieve exercise does not take into account man-made landforms, trees, or buildings or other structures. It is based on topographic data only.
